

FINAL PROJECT REPORT

Name, Surname	Ousmane NANAKASSE
Student ID	22 03 03 983
Name of the Project	Travel Bucket List

PROJECT DESCRIPTION

The “**Travel Bucket List**” project is a web application made using Python, Flask, HTML, and SQLite database.

It helps users save and manage places they want to visit. Users can register, login, add destinations, edit them, delete them, and view their travel list.

USER STORIES & ACCEPTANCE CRITERIA :

USR1(REGISTRATION): User can create a new account with username and password.

USR2(LOGIN): User can login with correct username and password.

USR3(ADD DESTINATION): User can save a new travel destination successfully.

USR4(EDIT DESTINATION): User can update destination information.

USR5(DELETE DESTINATION): User can remove a destination from the list.

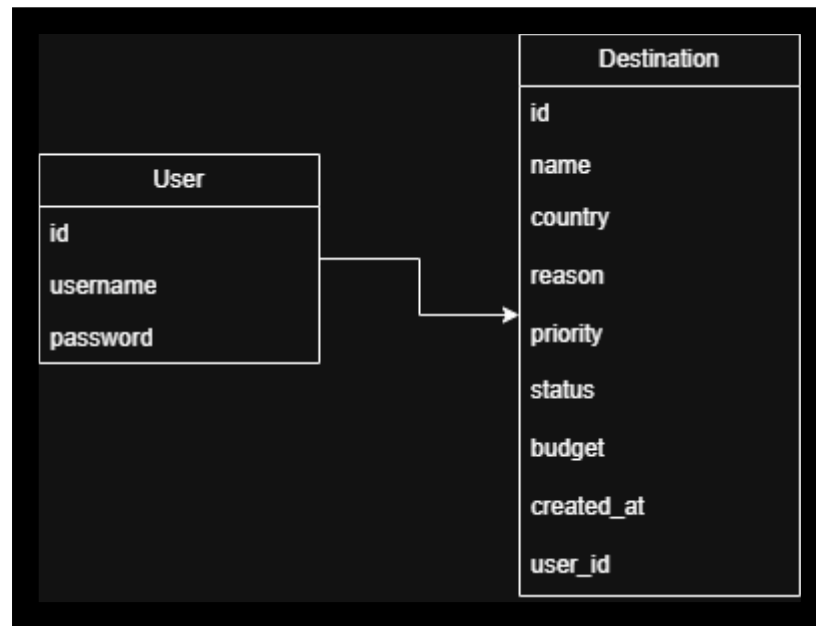

USR6(VIEW DESTINATIONS): User can see all saved destinations on dashboard.

USR7(DATE & TIME): System shows creation date and time for each destination.
